Farmers
Service Ops

Last updated on: 25 July 2024

Version : 1.04

Date	Version No	Change Initiated By	Updated By	Summary of Changes
04 July 2024	1.0	-	Karthik	Final version
16 July 2024	1.01	Farmers	Karthik	Shared main menu – DTMF option provided for spanish callers Shared ID & Auth – Unique policy collection menu offered for one specialty brands

Universal Business Rules (General)

S.No.	Functionality	Description	Exceptions
1	Business Hours	Varies from call center to call center	NA
2	Language of Interaction on IVR and self-service interaction	English	NA
3	Dial with interrupt	Applicable when a menu or an announcement is played	Not Applicable if there is a database access
4	No Input timeout	5 Seconds (Configurable)	NA
5	Maximum number of tries (invalid/no input by caller and values not found in DB would be consolidated as 3 tries)	Total of 3 tries/attempts No input and invalid input will have combined 3 tries.	Not Applicable
6	Touch Tone Entry	Application will accept Speech and DTMF	NA
7	Queue Music	Queue music would be played when a caller waits for an agent to attend	-

Standard Call Flow Conventions

This shape represents the Start or End of the IVR Application

This shape represents speech announcements without caller input

This shape represents any process that happens in the background

This shape represents the Menu option, the same shape also represents the collection of a string of digits (prompt and collect option).

This shape represents the host or database access.

This shape represents a condition on which a decision is made to chose a branch in the call flow. It can be based on the input provided by the caller or the result from some external processor (a database operation).

This shape is a page connector which means the continuation of the flow in the same page.

This shape is a page connector which means the continuation of the flow is in another page.

This shape is used for a process that has already been defined elsewhere. This indicates that there is another flowchart available for this predefined process, and should reference that source for more information. Typically is used to simplify complex flowcharts by moving a large part of the flowchart to another flowchart.

Shared KYC Main Flow - 1

Shared KYC Main Flow - 2

KYC Number of policies

Note
Prioritizing policies that match the DNIS they are calling in from
Policies are read in the order, the brand mapped to the DNIS is given the first preference and the rest follows. For multiple policies under same brand, choose the same order from the API response

If more than 1 type/policy is selected, narrow down to 1 policy by defaulting brand to policy matching the DNIS they called in from. If policies selected do not match DNIS used, default to the first on the list.

API URL :
https://api-ss.farmersinsurance.com/plcyms/v3/policiesAndClaims?operation=searchByPhone
Input : Criteria, Phone number
Output : Line of Business, Policy Type, Policy Category, Policy State code, Policy Source, Policy Number, Insured details(first name, last name, postal address, telephone number, Address, State, Postal code, City, email), Claims.

Warhead Check

----------Bristol West (Cust + Producer) ----------
BW policy formats are as follows (copied from the App Spec):
Bristol West policy numbers begin with 'G', 'H', 'U', 'W', or 'A' and continue with eleven digits.
Approximately 90 - 94% of policies begin with the letter G. Homeowners policies begin with H.

From the VUI Doc:
If caller enters a 4 as the first character of the policy ID the backend will attempt a validation with a G first and then an H if the G fails.
If caller enters 6 followed by 9 or 11 digits, interpret the 6 as M.

Specific Prefix List:
G00 (DTMF - 400 or 466),
G01 (DTMF - 401 or 461),
G55 (DTMF - 455),
G88 (DTMF - 488),
M00 (DTMF - 600 or 666),
W25 (DTMF - 925),
W37 (DTMF - 937),
NAC (DTMF - 622)

----------COMMERCIAL ----------
Account Numbers
An optional F or M, then 9-digits or 4-8 digit string F indicates a Farmers customer, and M indicates a Zurich customer.
Spoken 9-digit string preceded by optional letter F or M, OR spoken 4-8 digit string.
DTMF 9-digit string preceded by optional DTMF-3 or DTMF-6, OR DTMF 4-8 digit string.
If customerType = Farmers, optional initial character is F (spoken) or DTMF-3 (DTMF).
If customerType = Zurich, optional initial character is M (spoken) or DTMF-6 (DTMF).

If <9 digits, prepend zeros to complete 9 digits.

Policy Numbers
Optional 2- or 3-letter prefix (see list below; no DTMF for alpha) + 4-9 digits List of optional prefixes:
IA & EA-ECE Prefixes: CA CPP PAS RGC SCI TDM CFC OCP PJB RGM SCP TDP CFM OMP PPA RGP TC WC CFP PAA PPS SBS TDC EA
Core 29 prefixes: P&C [pronounced "P and C" or "P-n-C"] UMB WC
~~OR~~
Optional "WC" prefix + alpha (A-N, P-Z) + 8 digits.
The alpha character represents a rewrite of the same policy and is incremented starting with A, B, C, etc. Therefore it is expected that A will be the most frequent letter, followed by B, etc.

Commercial policies can be prefixed with zeros to come up with 9 digits

----------FARMERS (FDS)----------
Farmers policy numbers are 8-9 digits. The policy lookup is handled in the same way as for home and auto policies.

----------SPECIALTY----------
Foremost policy formats are as follows:
Foremost policy numbers entered by the caller can be 10, 12, 13, or 15 digits:
- 15 Digit input: (3-digit product code) - 10 digit policy number - (2-digit suffix)
- 13 Digit input: (3-digit product code) - 10 digit policy number
- 12 Digit input: 10 digit policy number - (2-digit suffix)
- 10 Digit input: 10 digit policy number

Foremost policy numbers may include a dash after the first 3 digits if the length is 13 or 15.
Foremost policy numbers may include a dash before the last 2 digits if the length is 12 or 15.
Foremost also accepts an optional G-prefix. These will swap into Bristol West flow.

----------FWS----------
FWS policy number capture rules:
Between 9 and 11 characters.
If 11 characters the first charactermust be an 'A', 'H' or 'U' in order to bevalid.
We need to strip the leadingcharacter and search only on the number, will always be a Guidewirepolicy.
This is also the only time a character is valid in this capture

The ARS policy returned will **not** have an alpha prefix for the lob. An example of the pertinent returned data being:
"policySource": "ARS",
"policyNumber": "1962910911",
"lineOfBusiness": "A",

However a met360 policy will have data including the below:
"policySource": "Met360",
"policyNumber": "H7990438591",
"lineOfBusiness": "H",

- Note: The way we collect policy number at FWSGetPolicyNumber remains the same. We allow the users to give the alpha prefix [whether ARS or Met360 because we will not know what the user will input] . Then strip the prefix while comparing policy number with API response.

We have separate **lineOfBusiness** field in API response to match LOB anyway.

As far as formats accepted in the Policy Collection Node:
When 11 digit number is given , the alpha prefix always has to be A/U/H/Y (which we strip when checking).
If there is no alpha prefix , the minimum digits expected is 10 digits because we force the user to give the suffix (which was required for ARS , if I am not mistaken).
We also look for 9 digits as a default - these would be callers who have forgotten the suffix. These are handled as No Matches and are prompted again (I believe).

Other criteria beyond that will be part of the code-related API decisions for how to handle policies!

----------21st / BW HI----------

21st and BW HI (Farmers Insurance Hawaii) policies follow the same format as general BW policies. That said, the T0-prefix and 2-digit suffix (Mod) are not visible to policyholders, so their policy number input will always be numbers only:

Examples:

T07-0135851-03 --> Customer will enter '70135851'
T04-6867225-11 --> Customer will enter '46867255'
T04-6226400-11 --> Customer will enter '46226400'
T07-0015193-11 --> Customer will enter '70015193'
T04-9367094-11 --> Customer will enter '49367094'

The IVR sends just the digit after the 'T0-' prefix plus the 7 following digits in the policy inquiry.

Example:

IN_REQ=Endpoint:https://api.farmersinsurance.com/cm/plcyms/v3/policies//{policyNumber} && Headers: frms_brand=21C,frms_source=24[7],frms_tid=4ba54fda-f559-11ee-d584-005056af9b20,frms_appid=1, && Input Request: ?policyNumber=70135851&$OUT_RESP=HTTP Code :200 && Response Body={"policySummary":{"address":[{"addressType":"StreetAddress","city":"HONOLULU","state":"HI","streetAddress1":"******","streetAddress2":null,"zip":"******"}],"autoPolicy":{"drivers":[{"dateofbirth":"******","gender":"F","licenseNumber":"******","electronicMailAddress":"******","cellNumber":null,"workPhoneNumber":"******","homePhoneNumber":null,"person":{"firstName":"******","lastName":"******","middleName":null},"relationship":"IN","status":"R"},{"dateofbirth":"******","gender":"F","licenseNumber":"******","electronicMailAddress":"******","cellNumber":null,"workPhoneNumber":"******","homePhoneNumber":null,"person":{"firstName":"******","lastName":"******","middleName":null},"relationship":"CH","status":"R"},{"dateofbirth":"******","gender":"M","licenseNumber":"******","electronicMailAddress":"******","cellNumber":null,"workPhoneNumber":"******","homePhoneNumber":null,"person":{"firstName":"******","lastName":"******","middleName":null},"relationship":"SP","status":"N"},{"dateofbirth":"******","gender":"M","licenseNumber":"******","electronicMailAddress":"******","cellNumber":null,"workPhoneNumber":"******","homePhoneNumber":null,"person":{"firstName":"******","lastName":"******","middleName":null},"relationship":"OT","status":"N"}],"insuredVehicle":[{"vehicleMake":"TOYT","vehicleModel":"4RUNNER SR5 LIMIT UT","vehicleYear":"2011","vin":"******"},{"vehicleMake":"TOYT","vehicleModel":"SCION XB UT","vehicleYear":"2011","vin":"******"},{"vehicleMake":"TOYT","vehicleModel":"TUNDRA CREWMAX SR PK","vehicleYear":"2007","vin":"******"},{"vehicleMake":"VOLK","vehicleModel":"GOLF","vehicleYear":"2012","vin":"******"}]},"lapseDate":"2024-09-01T00:00:00-04:00","lob":"AUTOP","cancellationDeclineDate":null,"continousInsuredIndicator":null,"paperlessIndicator":"1","masterCompanyCode":"90","policyNumber":"T07013585103","policySourceSystem":"POINT","policyStartDate":"2024-03-01T00:00:00-05:00","policyStateCode":"HI","policyStatus":"PCH"},"OccupationLicDegreeInd":null}
